### EXPERIENCE

#### Allshore Virtual Staffing

November 2021 - Present

#### Senior Software Developer

- Determines operational feasibility by evaluating analysis, problem definitions, requirements, solution developments, and proposed solutions or reviewing the current system if it already exists.
- Presents ideas for system development/improvement including project timeline while working closely with clients.
- Produces detailed specifications, writes the program codes and tests the product in controlled situations before going live.
- Records and demonstrates solutions by developing documentation, wireframes, flowcharts, layouts, diagrams, charts, training manuals for users, code comments and clearing code.
- Develops and deploys solutions by determining and designing system specifications, standards and programming.
- Communicates with clients directly about project requirements and details on a daily basis.
- Improves operations by conducting systems analysis, recommending changes and suggesting possible solutions.
- Learns about state-of-the-art development tools, programming techniques, and computing equipment. Additionally, continues to participate in educational opportunities.
- Develops software solutions by studying information needs, conferring with users, studying systems flow, data usage, work processes, investigating problem areas, and following the software development lifecycle.

### TOP SKILLS

PHP: 6 years

Laravel: 4 years

jQuery: 6 years

MySQL: 4 years

HTML: 1 year

- Regularly commits code to repository servers and backup work.

**Technologies:** PHP, Laravel, jQuery, MySQL

---

## **CBeyond Private Limited**

October 2020 - November 2021

### **Senior Software Engineer**

- Designed and implemented database schematics.
- Created REST APIs to be consumed by the front-end team.
- Worked on back-end module for basic CRUD operations for handling different entities.
- Created chat functionality using one of the Laravel packages and pusher.
- Reviewed regular codes of peer programmers.

**Technologies:** PHP, Laravel, jQuery, HTML, SASS, CSS, MySQL

---

## **Zameen. com**

April 2016 - October 2020

### **Senior Software Engineer**

- Consumed APIs to perform CRUD operations.
- Worked on creating new modules and maintained old modules.
- Worked on different products.
- Created a product from scratch, where XML files had to be resolved and important data was taken out and saved accordingly in the database.
- Worked on a shell script file, which ran on git commit command to check for PHP lint errors and if PSR-2 coding standards were violated or not. The file also managed to fix some of the errors self-using some PHP libraries.
- Reviewed regular codes of peer programmers.

**Technologies:** PHP, Laravel, MySQL, jQuery, CSS, HTML, Bootstrap

---

## **PROJECTS**

### **Jensen Mandarin**

Jensen Mandarin is an online platform for learning Mandarin. The purpose of the website was to provide a dashboard to students, instructors, and admin. Worked on creating mock-ups using the SRS document. Additionally, worked on all three dashboards and their related functionalities. Used PHP, CSS, jQuery, MySQL, HTML, CakePHP, Bootstrap and PayPal.

---

### **Feed Parser**

Parse XML project is used to update property listings information. Worked on parsing XML feeds consisting of properties where the XML was read from a specified URL. Used PHP and Laravel.

---

### **E-commerce Store**

E-Commerce Store is an online platform for connecting buyers and sellers. Worked on creating dashboards, with crud operations for categories, products and etc. Created a chat between buyers and sellers, and created APIs for the front-end team to consume. Used Laravel, PHP, Tailwind, HTML, CSS, SAS and jQuery.

## EDUCATION

### Bachelor of Science in Computer Science

National University of Computer and Emerging Sciences - NUCES (FAST)
