TOP SKILLS

EXPERIENCE

Allshore Virtual Staffing

November 2021 - Present

PHP Developer

- Determines operational feasibility by evaluating analysis, problem definitions, requirements, solution developments and proposed solutions or reviewing the current system if it already exists.
- Presents ideas for system development/improvement, including project timeline while working closely with clients.
- Produces detailed specifications, writes the program codes, and tests the product in controlled situations before going live.
- Records and demonstrates solutions by developing documentation, wireframes, flowcharts, layouts, diagrams, charts, training manuals for users, code comments and clearing code.
- Develops and deploys solutions by determining and designing system specifications, standards and programming.
- Communicates with clients directly about project requirements and details on a daily basis.
- Improves operations by conducting systems analysis, recommending changes and suggesting possible solutions.
- Learns about state-of-the-art development tools, programming techniques, and computing equipment. Additionally, continues to participate in educational opportunities.
- Develops software solutions by studying information needs, conferring with users, studying systems flow, data usage, work processes, investigating problem areas and following the software development lifecycle.

- Regularly commits code to repository servers and backup work.

Technologies: PHP, WordPress, JavaScript, jQuery, HTML, CSS, Bootstrap

Upwork

March 2020 - October 2021

Senior Full Stack Web Developer

- Direct communication with US clients most of the time.
- Developed pre-built themes according to the client's design/requirements.
- Modified pre-built themes.
- Designed and developed custom themes from scratch.
- Designed and developed custom plugins according to the specific requirements of the client.
- Designed and developed custom widgets according to the design needs and client's ease.
- Worked on ACF PRO for custom fields.
- Worked on popular themes and plugins available on the marketplaces.
- Provided detailed documentation/videos to the clients so that they can know how to manage their website in the future.
- Worked on WooCommerce customizations.

Technologies: HTML, CSS, Bootstrap, JavaScript, jQuery, PHP, MySQL, WordPress

Grids Hub

November 2016 - July 2020

Full Stack Web Developer

- Designed and developed custom WordPress themes from the scratch.
- Developed custom Widgets according to the need of a design for the ease of the customer.
- Trained new interns for the company.
- Reviewed code, debugged problems and corrected issues.
- Delivered performance-driven and user-centric websites that met all business requirements.
- Managed milestones from initial steps through final delivery.
- Contributed ideas and suggestions in team meetings and delivered updates, designs and enhancements on deadlines.

Technologies: HTML, CSS, Bootstrap, JavaScript, jQuery, PHP, MySQL, WordPress

PROJECTS

Assessment Tool

The assessment tool has eight different tabs and each tab has 4 different questions. All questions will be hidden except the first. In the end, the goal was to send all the questions and answers to the admin of the site and also to the user sorted by marks. I worked on developing a plugin so that the client can use that tool on any WordPress website. I designed and developed a custom plugin as there was no plugin available on any marketplace for that specific requirement. I used HTML5, CSS3, Bootstrap 5, JavaScript, jQuery, PHP, MySQL, WordPress.

Kherriyam

The goal was to design and develop a custom ECommerce website using a WooCommerce plugin. I worked on creating a design following PSD mockup and then created the website by customizing almost every single template of the WooCommerce plugin. I used HTML5, CSS3, Bootstrap 4, JavaScript, jQuery, ACF, PHP, WordPress.

Children and Spousal Support Calculator

The main goal of this project was to create a child/spousal calculator based on the input values from a user through a form for Canadian residents. I worked on creating a calculator in WordPress using Gravity Forms plugins and provided the results on the result page. Used WordPress, JavaScript, jQuery, PHP.
