EXPERIENCE

Allshore Virtual Staffing

November 2019 - Present

Senior PHP Developer

- Determine operational feasibility by evaluating analysis, problem definition, requirements, solution development, and proposed solutions or reviewing the current system if it already exists.
- Present ideas for system development/improvement, including project timelines while working closely with clients.
- Produce detailed specifications, write the program codes, and test the product in controlled, real situations before going live.
- Record and demonstrate solutions by developing documentation, wireframes, flowcharts, layouts, diagrams, charts, training manuals for users, code comments, and clear code.
- Develop and deploy solutions by determining and designing system specifications, standards, and programming.
- Communicate with clients directly about project requirements and details on a daily basis.
- Improve operations by conducting systems analysis, recommending changes, and suggesting possible solutions.
- Learn about state-of-the-art development tools, programming techniques, and computing equipment. Continue to participate in educational opportunities.
- Develop software solutions by studying information needs, conferring with users, studying systems flow, data usage, and work processes, investigating problem areas, and following the software development lifecycle.
- Regularly commit code to repository servers and back-up work.

Technologies: PHP, Laravel, MySQL, jQuery, HTML, CSS, WordPress
