### EXPERIENCE

#### Allshore Virtual Staffing

June 2022 - Present

#### .NET Developer

- Determine operational feasibility by evaluating analysis, problem definition, requirements, solution development, and proposed solutions or reviewing the current system if it already exists.
- Present ideas for system development/improvement, including project timeline while working closely with clients.
- Produce detailed specifications, writing the program codes, and testing the product in controlled, real situations before going live.
- Record and demonstrate solutions by developing documentation, wireframes, flowcharts, layouts, diagrams, charts, training manuals for users, code comments, and clear code.
- Develop and deploy solutions by determining and designing system specifications, standards, and programming.
- Communicate with clients directly about project requirements and details on a daily basis.
- Improve operations by conducting systems analysis, recommending changes, and suggesting possible solutions.
- Learn about state-of-the-art development tools, programming techniques, and computing equipment. Continue to participate in educational opportunities.
- Develop software solutions by studying information needs, conferring with users, studying systems flow, data usage, and work processes, investigating problem areas, and following the software development lifecycle.
- Regularly commit code to repository servers and back-up work.

**Technologies:** Business Intelligence, MS SQL Server, ASP.NET Web Forms

---

## All About IT

March 2020 - May 2022

### Primary Lead / Head of Development

- Developed scrapper tool (Leads scrapping) in WinForms that will log in to the target website, searched for the predefined pattern, grabbed the result one by one and generated the CSV file.
- Automated the manual process that they were running from the database level, developed the frontend website (intranet) from their existing database-driven process. Now users can use the website and process the quarterly changes and generate the summary report in excel format.
- Streamlined their existing intranet workflow process, and fixed all the issues.
- Team management, daily team activity tracking, and task assignments.
- Client meetings.

**Technologies:** C#, VB.NET, ASP.NET, MS SQL Server, SQL Server Reporting Services (SSRS), SQL Server Integration Services (SSIS), jQuery, JavaScript, WordPress, MySQL

---

## Basecamp Data Solutions

July 2013 - February 2020

### Technical Lead

- Worked on the product features, and developed an Employee management module with roles and permissions management.
- Developed a distribution module where employees are assigned to a distribution list for a particular report to be sent out to the client.
- Developed and automate the process of sending dynamically generated data-driven reports to the client on scheduled days and times.
- Team management, daily team activity tracking, and task assignment.
- Meetings with higher management for new work, requirement gathering, planning, and execution.

**Technologies:** C#, ASP.NET, MS SQL Server, jQuery, JavaScript, AJAX, SQL Server Reporting Services (SSRS), SQL Server Integration Services (SSIS)

---

## PROJECTS

### Selling Cars Model

Eurospec diecast models are based in Sydney Australia, and shipping locally and around the world. Showcasing a vast variety of diecast and resin models from various manufactures worldwide and stocking a huge number of hard and sought after cars and truck and memorabilia. Worked on the theme and database and implement the UI customization as per client requirement, integrating payment gateway for online purchasing. Used WordPress, PHP, jQuery, JavaScript, HTML, CSS, MySQL.
