### TOP SKILLS

### EXPERIENCE

#### Allshore Virtual Staffing **August 2022 - Present**

#### PHP Developer

- Determine operational feasibility by evaluating analysis, problem definition, requirements, solution development, and proposed solutions or reviewing the current system if it already exists.
- Present ideas for system development/improvement, including project timeline while working closely with clients.
- Produce detailed specifications, write the program codes, and testing the product in controlled, real situations before going live.
- Record and demonstrate solutions by developing documentation, wireframes, flowcharts, layouts, diagrams, charts, training manuals for users, code comments, and clear code.
- Develop and deploy solutions by determining and designing system specifications, standards, and programming.
- Communicate with clients directly about project requirements and details on a daily basis.
- Improve operations by conducting systems analysis, recommending changes, and suggesting possible solutions.
- Learn about state-of-the-art development tools, programming techniques, and computing equipment. Continue to participate in educational opportunities.
- Develop software solutions by studying information needs, conferring with users, studying systems flow, data usage, and work processes, investigating problem areas, and following the software development lifecycle.
- Regularly commit code to repository servers and backup work.

**Technologies:** PHP, WordPress, Laravel, JavaScript, jQuery, HTML, CSS, Shopify API

---

## Objectual Systems

April 2021 - July 2022

### Lead CMS Developer

- Provided my services as a Full Stack/ WordPress Plugin and Theme Developer.
- Supervised the building of Shopify Apps and Themes using the latest technologies.
- Integrated third-party API into websites and apps.

### Full Stack Developer

- Provided my services as a Full Stack/ WordPress Plugin and Theme Developer.
- Responsibilities included converting client-provided designs into Premium WordPress/WooCommerce themes and developing custom widgets for Elementor.
- Integrated various complex functionalities into WordPress, such as socket.io into WordPress for chat functionality.
- Worked on some very popular plugins, such as Zoom Integration with WordPress. Built highly tailored web applications using Laravel.

**Technologies:** WordPress, MySQL, PHP, Laravel, Shopify API, JavaScript, WooCommerce, GraphQL, RESTful API, WordPress Theme Development, WordPress Plugin Development

---

## PROJECTS

### Beternal

A platform where users can record video, voice, and ecards and schedule them to be delivered to their contacts. Worked with a team of two backend developers, a front-end developer, and a DevOps engineer to create the complete system. I handled the documentation, backend development, and deployment. Used technologies such as Laravel, HTML, MySQL, OOP, JavaScript, jQuery, AWS, PHP, and AWS S3.

URL: <https://beternal.life>

---

### Clynk

This is a ticket generation and event management web application. The platform allows vendors to sign up with their venues and add packages. Worked on collaborating with a front-end developer and a UI designer and handled the back-end myself. Used PHP, Bootstrap, MySQL, and JavaScript.

URL: <https://objectual.io/clynk2>

---

## GoldBeltHeritage

This is a custom dashboard for WordPress to create applications on the front-end, and allow students and employees to fill those applications out. Worked on developing and managing the complete project and attended meetings to gather client requirements and project management. Used PHP, WordPress, GravityForms, JavaScript, jQuery, and SendGrid.
