### TOP SKILLS

JavaScript: 1 year

ReactJS: 3 years

Redux: 1 year

MongoDB: 1 year

### EXPERIENCE

#### Allshore Virtual Staffing

May 2022 - Present

#### React JS Developer

- Determine operational feasibility by evaluating analysis, problem definition, requirements, solution development, and proposed solutions or reviewing the current system if it already exists.
- Present ideas for system development/improvement, including project timeline while working closely with clients.
- Produce detailed specifications, writing the program codes, and testing the product in controlled, real situations before going live.
- Record and demonstrate solutions by developing documentation, wireframes, flowcharts, layouts, diagrams, charts, training manuals for users, code comments, and clear code.
- Develop and deploy solutions by determining and designing system specifications, standards, and programming.
- Communicate with clients directly about project requirements and details on a daily basis.
- Improve operations by conducting systems analysis, recommending changes, and suggesting possible solutions.
- Learn about state-of-the-art development tools, programming techniques, and computing equipment. Continue to participate in educational opportunities.
- Develop software solutions by studying information needs, conferring with users, studying systems flow, data usage, and work processes, investigating problem areas, and following the software development lifecycle.
- Regularly commit code to repository servers and backup work.

**Technologies:** ReactJS, MongoDB, JavaScript, Redux

---

## Enocder Squad

February 2020 - February 2022

### MERN-STACK Developer

- Worked on two large-scale applications in React and Vue.
- Built stable and maintainable codebases.
- Used JIRA as the bug tracking system to track and maintain the history of bugs/issues on an everyday basis.
- Used GraphQL API and Rest API.
- Used apollo/client for fetch and post GraphQL data.
- Used code splitting and lazy loading.
- Worked on a back-end database and API.

**Technologies:** ReactJS, Redux, TypeScript, GraphQL, SASS, Figma, Vue.js, MongoDB, Node.js, Express.js, Git

---

## RNS SOLUTIONS

December 2019 - February 2020

### REACT DEVELOPER

- Designed and implemented RESTful APIs.
- Worked on creating responsive websites' single page application using the provided Mockups/Designs in React.
- Implemented Redux to maintain the global state of frontend application and communicate with API's.
- Utilized HTML, CSS, JavaScript, TypeScript, SASS, Bootstrap, Material-UI Git and REACT , Redux,
- Resolved frontend UI/UX issues.

**Technologies:** HTML, Bootstrap, SASS, JavaScript, ReactJS, Redux, Firebase, Figma, TypeScript, Git

---

## PROJECTS

### Twitter clone

This is a twitter social media site clone. I made this completely from scratch for my own study/exercise. This project has all the features like tweeking , retweeting , liking , following , unfollowing , searching , timelines, user timelines, notifications, exploring tweets and users, post trends, searching trends and many more. Used React, TypeScript, Redux, Bootstrap, Node, Express and MongoDB.

URL : <https://itwitter.netlify.app/>

---

### Instagram clone

This is a social media Instagram site clone. Worked on building it from scratch. Users can follow request to anyone. Users can like and comment on posts. User is able to see posts of his following. Used Vue, Vuex, Bootstrap and Firebase.

URL : <https://hellogram-vue.netlify.app/>

---

### Card Game

This is a simple card game. There are some player cards. Once a

card from overview is selected, it's entirely shown in the 'details' view and also highlighted to indicate what is selected. There is a functionality to sort the cards by name in ascending and descending direction. I used React, React and React Router.
