TOP SKILLS

EXPERIENCE

Allshore Virtual Staffing

December 2020 - Present

Senior PHP Developer

- Determine operational feasibility by evaluating analysis, problem definition, requirements, solution development, and proposed solutions or reviewing the current system if it already exists.
- Present ideas for system development/improvement, including project timeline while working closely with clients.
- Produce detailed specifications, writing the program codes, and testing the product in controlled, real situations before going live.
- Record and demonstrate solutions by developing documentation, wireframes, flowcharts, layouts, diagrams, charts, training manuals for users, code comments, and clear code.
- Develop and deploy solutions by determining and designing system specifications, standards, and programming.
- Communicate with clients directly about project requirements and details on a daily basis.
- Improve operations by conducting systems analysis, recommending changes, and suggesting possible solutions.
- Learn about state-of-the-art development tools, programming techniques, and computing equipment. Continue to participate in educational opportunities.
- Develop software solutions by studying information needs, conferring with users, studying systems flow, data usage, and work processes, investigating problem areas, and following the software development lifecycle.
- Regularly commit code to repository servers and back-up

work.

PROJECTS

regmatch

Regmatch is an Event management and ticketing tool with an extra feature of B2B matchmaking. Users can create accounts as Meeting Planners (Event Managers) and set up their events, attendees can register for events and also request matchmaking with other businesses based on selected criteria.

The special custom feature of matchmaking creates matches for attendees based on the information provided by the attendees and creates schedules based on settings from the meeting planner. Worked on this project and responsible for requirement gathering, requirement analysis, project architecture, and meeting deadlines. Used PHP, Laravel, WordPress, MySQL, VueJS, Vuetify, Vuex, Axios, jQuery, and Ajax.

URL: <https://regmatch.com/>

regmatch App

This is a hybrid mobile application for the regmatch platform. It

allows you to sign up, log in, create a profile, browse events, view event details, and set sessions as favorite. Worked on native functionalities used, maps to display address integration with regmatch platform as the backend server, JWT authentication, built and deployed the app using Xcode, built and deployed the app using Android Studio. Used Ionic Framework, Capacitor, Angular, PHP, MySQL, and Firebase Cloud Messaging.

Badge-Creator

Badge-Creator is a name badge design and print application for events. Worked on integration with regmatch platform to fetch events with attendees, authorized .NET payment gateway integration, drag and drop badge design, printing and PDF download of badges, compatible with selected Avery templates. Used Laravel, PHP, MySQL, Vue.JS, Vuetify, Vuex, Axios, and SVG.js.
