EXPERIENCE

Allshore Virtual Staffing

July 2022 - Present

PHP Developer

- Determine operational feasibility by evaluating analysis, problem definition, requirements, solution development, and proposed solutions or reviewing the current system if it already exists.
- Present ideas for system development/improvement, including project timeline while working closely with clients.
- Produce detailed specifications, writing the program codes, and testing the product in controlled, real situations before going live.
- Record and demonstrate solutions by developing documentation, wireframes, flowcharts, layouts, diagrams, charts, training manuals for users, code comments, and clear code.
- Develop and deploy solutions by determining and designing system specifications, standards, and programming.
- Communicate with clients directly about project requirements and details on a daily basis.
- Improve operations by conducting systems analysis, recommending changes, and suggesting possible solutions.
- Learn about state-of-the-art development tools, programming techniques, and computing equipment. Continue to participate in educational opportunities.
- Develop software solutions by studying information needs, conferring with users, studying systems flow, data usage, and work processes, investigating problem areas, and following the software development lifecycle.
- Regularly commit code to repository servers and back-up work.

Technologies: PHP, Laravel, WordPress, JavaScript, jQuery, HTML, CSS, MySQL, Bootstrap

Periculum Technologies Inc.

September 2020 – June 2021

DevOps Developer

- Worked on the following technologies: Azure, MongoDB, SQL, Azure Blob Storage, .NET, Core Razor, .NET Core MVC, and .NET Core Web APIs.
- Wrote server-side web application logic for financial products.
- Created and managed databases (MongoDB & MSSQL)
- Developed back-end components, connecting the application with the other (often third-party) web services.
- Deployed web apps on the Azure platform.

Technologies: MongoDB, .NET Core, Razor Page, ASP.NET MVC, ASP.NET Web API

Abtach Ltd.

July 2020 – October 2020

Sr. Executive Web Developer

- Designed & developed WordPress websites.
- Created and managed databases.
- Supported the front-end developers by integrating their work with the application.
- Developed back-end components, connecting the application with the other (often third-party) web services.
- Worked on coding and modified website functionality.

Technologies: HTML, CSS, JavaScript, jQuery, Bootstrap, PHP, WordPress, MySQL

PROJECTS

Kleise - Listing & Online Booking Platform

The website has two different user roles which are regular users and owners. Owners can list their places, purchase different packages for listing their places and regular users can search different places as well as book places using multiple different payment gateways. Worked on creating the site from a built-in theme on WordPress, and developed all the functionalities as follows: multiple user roles, listing packages management, place booking, and integration of different payment gateways. Used HTML, CSS, JavaScript, jQuery, PHP, and WordPress.

URL: <https://www.kleise.gr/>

Femnoise - Connect with Music Industry Professionals

This website has multiple functionalities. Firstly, it has a community where different professionals can interact with each other, make friends, publish posts, chat, make groups, etc. It also has a complete job portal where people can post job ads,

candidates can apply, and land jobs. Worked on creating the site from a built-in theme on WordPress, and developed all the functionalities as follows: social platform, users can interact, chat, make friends, can post, and apply for jobs. Used HTML, CSS, JavaScript, jQuery, PHP, and WordPress.

The Good Flour Co.

This website is an e-commerce website for retail and wholesale businesses, and the website contains a page where it mentions all the places where their products are available. Worked on creating the site from scratch on Shopify, the major functionality was the store locator, which I developed using Google Maps API. Used HTML, CSS, JavaScript, jQuery, and Shopify.
