TOP SKILLS

EXPERIENCE

Allshore Virtual Staffing

August 2019 - Present

Software Engineer

- Determine operational feasibility by evaluating analysis, problem definition, requirements, solution development, and proposed solutions or reviewing current system if it already exists.
- Present ideas for system development/improvement, including project timeline while working closely with clients.
- Produce detailed specifications, writing the program codes, and testing the product in controlled, real situations before going live.
- Record and demonstrate solutions by developing documentation, wireframes, flowcharts, layouts, diagrams, charts, training manuals for users, code comments, and clear code.
- Develop and deploy solutions by determining and designing system specifications, standards, and programming.
- Communicate with clients directly about project requirements and details on a daily basis.
- Improve operations by conducting systems analysis, recommending changes, and suggesting possible solutions.
- Learn about state-of-the-art development tools, programming techniques, and computing equipment. Continue to participate in educational opportunities.
- Develop software solutions by studying information needs, conferring with users, studying systems flow, data usage, and work processes, investigating problem areas, and following the software development lifecycle.
- Regularly commit code to repository servers and back-up work.

Technologies: C#, ASP.NET MVC, ASP.NET Web API, Entity Framework, MS SQL Server, JavaScript, jQuery, HTML, CSS

.NET Developer

- Discussed and finalized all solutions for development requirements with managers and team.
- Developed and submitted required screen prototypes.
- Implemented all front-end and back-end requirements.
- Regularly created and updated user stories and tasks on Azure DevOps.

Technologies: Entity Framework, HTML, CSS, jQuery, Bootstrap, Microsoft Azure, MS SQL Server, .NET Core

Komatsu Pakistan Soft

December 2016 - April 2019

Associate Software Engineer

- Managed all project development.
- Involved in strategic business planning and requirement analysis with stakeholders.
- Developed web application and WCF Services in ASP.NET MVC with Microsoft SQL Server.
- Managed day-to-day communication between project team and client.
- Simultaneously managed workflow and deadlines on multiple projects.
- Assisted the documentation and QA teams in understanding the requirements and work structure to estimate effort required for each task.

Technologies: ASP.NET MVC, C#, ASP.NET Web API, RESTful API, HTML, jQuery, CSS, Bootstrap, MS SQL Server, Android App Development, Material Design, Team Foundation Server (TFS)

PROJECTS

Human Resource Management System

Human Resource Management System is an online system that manages employee data, attendance records, business trips, calendars, travel information, etc. Built the entire application in ASP.NET MVC and MS SQL Server. Also built RESTful services for different functionalities such as auto generated notifications.

KAppStore

KAppStore is a centralized solution for wireless distribution and installation of Android and iOS applications. Managed the admin portal, Android application, and services used for client-side applications. Integrated admin portal with other portals within the company and provided a communication medium to clients with the app store distribution portal. Used ASP.NET MVC, MS SQL Server, iOS, and Android.

KDM

KDM is a device monitoring and management portal that manages Android devices. Developed and managed the entire application including admin and client-side modules. Used Android Management API to implement device features. Also used ASP.NET MVC and MS SQL Server.

EDUCATION

Bachelor of Engineering in Information Technology

University of Engineering and Technology, Taxila
