TOP SKILLS

EXPERIENCE

Allshore Virtual Staffing

May 2019 - Present

.NET Developer

- Determine operational feasibility by evaluating analysis, problem definition, requirements, solution development, and proposed solutions or reviewing current system if it already exists.
- Present ideas for system development/improvement, including project timeline while working closely with clients.
- Produce detailed specifications, writing the program codes, and testing the product in controlled, real situations before going live.
- Record and demonstrate solutions by developing documentation, wireframes, flowcharts, layouts, diagrams, charts, training manuals for users, code comments, and clear code.
- Develop and deploy solutions by determining and designing system specifications, standards, and programming.
- Communicate with clients directly about project requirements and details on a daily basis.
- Improve operations by conducting systems analysis, recommending changes, and suggesting possible solutions.
- Learn about state-of-the-art development tools, programming techniques, and computing equipment. Continue to participate in educational opportunities.
- Develop software solutions by studying information needs, conferring with users, studying systems flow, data usage, and work processes, investigating problem areas, and following the software development lifecycle.
- Regularly commit code to repository servers and back-up work.

Technologies: C#, ASP.NET MVC, ASP.NET Web API, Angular, Entity Framework, HTML, CSS, JavaScript, MS SQL Server, Knockout.js, jQuery

Software Engineer

- Worked on a single-page application using SQL Server, Angular, and jQuery.
- Developed UI using Angular and SurveyJS.
- Performed unit testing and reviewed application built in ASP.NET CORE and JavaScript libraries.
- Developed stored procedures using SQL for manipulating JSON packets, and returning the response back to the front-end and rendering it.

Technologies: .NET Core, C#, Angular, Web APIs, LINQ, Bootstrap

Generix Solutions

November 2017 - December 2018

Lahore

Software Engineer

- Developed responsive front-end interfaces using modern web standards with a focus on usability.
- Developed back-end applications using Entity Framework.
- Developed contemporary JS plugins like jqGrid and data tables.
- Designed patterns like repository pattern, dependency injection, and inversion of control for efficient data management.

Technologies: ASP.NET, C#, Web APIs, Oracle SQL, Team Foundation Server (TFS), HTML, Bootstrap, LINQ to SQL, jQuery

PROJECTS

CloudPital

CloudPital is a hospital information system that provides data management. Generated reports using Google Visualization APIs for the front end and used LINQ queries for the back end to link with the data source. Also created client and server-side converters to map Knockout models with ASP.NET. Used JavaScript, Entity Framework, Bootstrap, HTML, and CSS.

SMART ERP System

Smart ERP is a web-based enterprise resource planning software that automates workflow. Wrote stored procedures in PostgreSQL and LINQ queries for data extraction. Used Entity Framework as data-access middle ware for retrieving data and updating records in database. Also used C#, ASP.NET MVC, jQuery, JavaScript, Bootstrap, HTML, and CSS.

Enhanced Direct Enrollment System

Enhanced Direct Enrollment System is a single sign-on web portal for health care users. Developed project using ASP.NET Core and AngularJS. Responsible for User Interface using an open source library SurveyJS.

EDUCATION

Bachelor of Science in Computer Science

P.U.C.I.T Lahore
