EXPERIENCE

Allshore Virtual Staffing

May 2019 - Present

.NET Developer

- Determine operational feasibility by evaluating analysis, problem definition, requirements, solution development, and proposed solutions or reviewing current system if it already exists.
- Present ideas for system development/improvement, including project timeline while working closely with clients.
- Produce detailed specifications, writing the program codes, and testing the product in controlled, real situations before going live.
- Record and demonstrate solutions by developing documentation, wireframes, flowcharts, layouts, diagrams, charts, training manuals for users, code comments, and clear code.
- Develop and deploy solutions by determining and designing system specifications, standards, and programming.
- Communicate with clients directly about project requirements and details on a daily basis.
- Improve operations by conducting systems analysis, recommending changes, and suggesting possible solutions.
- Learn about state-of-the-art development tools, programming techniques, and computing equipment. Continue to participate in educational opportunities.
- Develop software solutions by studying information needs, conferring with users, studying systems flow, data usage, and work processes, investigating problem areas, and following the software development lifecycle.
- Regularly commit code to repository servers and back-up work.

Technologies: C#, ASP.NET MVC, Entity Framework, ASP.NET Web API, MS SQL Server, JavaScript, jQuery, HTML, CSS, Angular, Bootstrap, Windows Communication Foundation (WCF)

jQuery: 2 years

ASP.NET Web API: 2 years

PROJECTS

Zbizlink

Zbizlink is a web-based work space managing entire proposal life-cycle and library. A user can create a company, add employees, and send/receive partnership requests. Developed company, employee, opportunity requirement, and scheduler modules. Designed and developed the site using ASP.NET MVC, ASP.NET Web API, Microsoft SQL Server, Entity Framework, AngularJS, JavaScript, jQuery, HTML5, CSS3, Bootstrap, and Kendo UI.

MindToSite

MindToSite is an eCommerce application where users can select and buy a product online. Was responsible for developing all services including user registration, login, reset and forgot password, product categories, and credit card management. Developed using ASP.NET MVC, WCF services, Microsoft SQL Server, Entity Framework, JavaScript, jQuery, Bootstrap, HTML, and CSS.

PizzApp

PizzaApp is an eCommerce application which displays a list of menus to customers. Users have an option to select their desired menu from the list or customize it with different types of ingredients. Developed all services including user registration, login, product categories list, categories items list, cart management, checkout management, PayPal integration, and credit card integration. Used skills such as ASP.NET MVC, WCF services, Microsoft SQL Server, Entity Framework, JavaScript, jQuery, Bootstrap, HTML, CSS.
